

PISCES FISH MACHINERY, Inc.

## FR-3500 Filleting Machine

The FR 3500 filleting machine is specifically designed to produce high yielding fillets from fish in the size range 600 grams to 3.5 KG dependent on species.

Species handling capability includes Tilapia, Trout, Arctic Char, Barramundi, Snappers and similar species where the rib follows the contour of the belly cavity.

Incorporating belly opening and eviscerating components the machine requires only that the fish be headed before introduction to the machine and can be used in conjunction with the Pisces HV 30V head cutter.

The FR 3500 utilizes the Pisces patented three blade backbone removal system and employs a PLC with user friendly interface for precise control of rib removal.

## High-Yield Fillets

# FR-3500

### Technical Specifications

|   |  |
|---|--|
| <b>Water Connections</b>  | Standard Garden Hose Connection 1/2"   |
| <b>Water Usage</b>  | 3.8 liters/minute (1 US gallon/minute) |
| <b>Electrical</b>   | 3 phase, 208-480 Volts, 50/60 Hz       |
| <b>Power</b>  | 10.5 Hp (7.7 Kw)                       |
| <b>Operators</b>  | 1                                      |
| Specifications subject to change without notice. This machine is subject to U.S. and International patents and meets all CE machine directives. |  |

- **High yield and production rates**
- **User friendly PLC interface**
- **Easy to operate and maintain**
- **Low operating and maintenance costs.**
