

PISCES FISH MACHINERY, Inc.

SF-12/14

The SF-12/14 is a combination machine designed for both heading and gutting operations for a head-off belly open fish in a single unit. The machines efficiently open the belly, completely clean the fish and delivers a pan-ready product..

KEY FEATURES

- High-speed for production rates
- Open hygienic design
- Gentle fish handling
- Easy to operate and maintain
- Low operating and maintenance costs
- Robust design
- Small footprint
- Easy and fast adjustment for different fish size

METHOD OF OPERATION

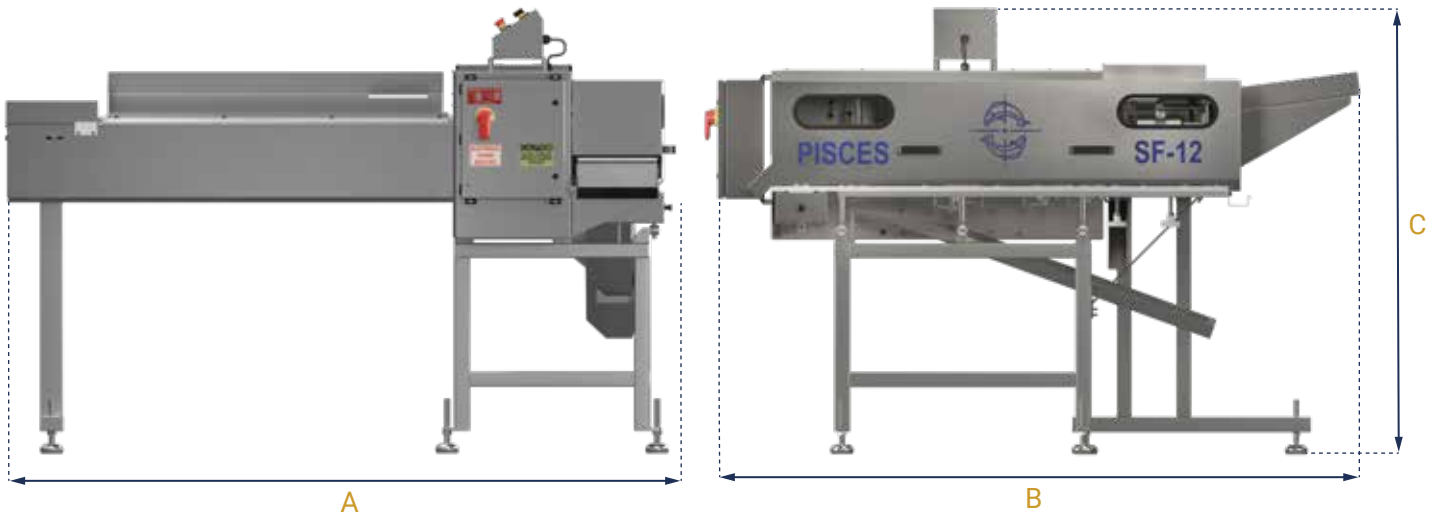

Up to four operators feed fish head-first onto the moving conveyor, where a revolving brush positions them for precise head cutting. After head removal, heads are ejected into a chute, and bodies move to the eviscerating section. Conveyor belts guide the fish over a belly-splitting blade and a cleaning wheel, efficiently removing viscera, including the digestive tract and kidney. The fish then passes through a washing station, leaving the abdominal cavity in good condition.

SPECIFICALLY DESIGNED

TO PRODUCE HIGH-SPEED HEAD-OFF BELLY OPEN PRODUCT FROM FISH IN THE SIZE ESF-12 UP TO 3 TO 12 INCHES IN LENGTH, UP TO 12,480 FISH/HOUR AND CONVEYOR SPEED-UP TO 260 TRAYS/MINUTE. SF-14 UP TO 100 TO 140 FISH PER MINUTE DEPENDING ON THE SPECIES.

WIDE RANGE OF SPECIES

Smelt, sardine, anchovy, sprat, thread fish, pilchard or similar species.

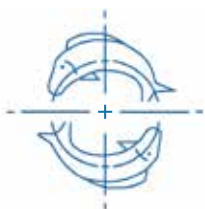

mm	A	B	C
SF-12	3035	1635	1210
SF-14	3035	1635	1210

These are indicative values.
Detailed drawings are available on request.

Exclusively Devoted to the Fish Processing Industry

Utilities	
	Standard Garden Hose Connection $\frac{3}{4}$ female 19 Liters/minute (5 US gallon/minute)
	Per customer specifications, single or three phase available 5 Ampere full load
	3-4

Specifications subject to change without notice. This machine is subject to U.S and international patents and meet all CE machine directives.
