

PISCES FISH MACHINERY, Inc.

FR-65/75/95

The FR-75/95 are designed with the smaller and start-up processors in mind.

The machine's simple design and construction make operation and maintenance easy.

The design simplifications have not effected the performance.

METHOD OF OPERATION

Head-off, belly open and gutted fish is fed onto the feed guide, then the fish is transported by drive belts to a pair of blades which remove the backbone and ejected out of the bottom of the machine. The fillets continues to the rib removal blades, ribs are then removed from the fillets and ejected out of the bottom of the machine. Fillets exit at the outfeed of the machine.

FR-65 MAXIMUM RIB LENGTH 40MM/1.5IN.

FR-75 MAXIMUM RIB LENGTH 50MM/2IN.

FR-95 MAXIMUM RIB LENGTH 75MM/3IN.
